

I strongly oppose any effort to block satellite radio stations from broadcasting local traffic and weather. I subscribed to satellite radio because of my frustration with the local radio stations in the Atlanta area. I feel that if I am willing to pay for the special radio and the monthly fee that I should be entitled to content that is useful to me. The local stations will have plenty of people left who will be unwilling to pay for this extra level of service. I believe that satellite radio exists because the normal broadcast stations have done a poor job of serving the public. In a free and open society such as ours an unrestricted marketplace will be in the best interest of the citizens.
